Student Acceptable Computer Use Policy

The Internet is a global network of networks connecting many millions of computers. The Internet is an environment of independent, unregulated resources that can change on a daily basis. This resource is used similar to the way books, magazines, newspapers and videos are used in an educational setting.

STCS and AWA are preparing students for the 21st century by offering up to date computer resources to complement the curriculum. The Internet is a valuable tool offering a vast number of resources at the click of a mouse.

It is a general expectation that the schools resources are to be used in a reasonable, efficient, ethical, moral and legal manner in accordance with the beliefs and policies of STCS/AWA. Computer storage areas will be treated like student lockers. Administrators may review files and communications to maintain system integrity and ensure that students are using the system responsibly. Computer use will be monitored by a teacher, but students are responsible for following the guidelines for appropriate use and bear the consequences for misuse. Assigned passwords are to be kept confidential and not shared with other students.

The following are NOT permitted:

- Accessing, displaying or sending pornographic or offensive material, whether written or graphic.
- Accessing, displaying or sending materials that are derogatory toward any race, religion, culture, ethnic group, gender or sexual orientation.
